Question 1

Write a program that outputs the following:

```
* * * * * * * * * *
* Welcome *
* * * * * * * * * *
```

Use class name `Welcome`

Question 2

Write a program that reads three integer numbers into 3 variables and then prints the following:

1- Sum of these numbers.

2- Multiplication of these numbers.

3- Average of these numbers.

4- The first number to the power of the second number. Use `Math.pow` method from Java library.

Use class name `Numbers`

Here is a sample run:

```
Enter three numbers: 1 5 7
Sum = 13
Mult = 35
Avr = 4.333333333333333
Pow = 1.0
```
