Q2 – B

```java
public class Square
{
        public static void main( String[] args)
        {
                Scanner kb = new Scanner(System.in);
                int n = kb.nextInt();

                for (int i = 0; i < n; i++)
                {
                        System.out.print("*");

                        if ((n % 2 == 0) || (i == 0) || (i == n-1))
                                for(int j = 1; j < n-1 ; j++)
                                        System.out.print("*");
                        else
                                for(int j = n-1 ; j > 1 ; j--)
                                        System.out.print(" ");

                        System.out.println("*");
                }
        }
}
